

A secure digital filing cabinet right at your fingertips.

Securely archives documents
of any size or format
as digital files
and gives you
instant access
to your records
anytime,
anywhere.

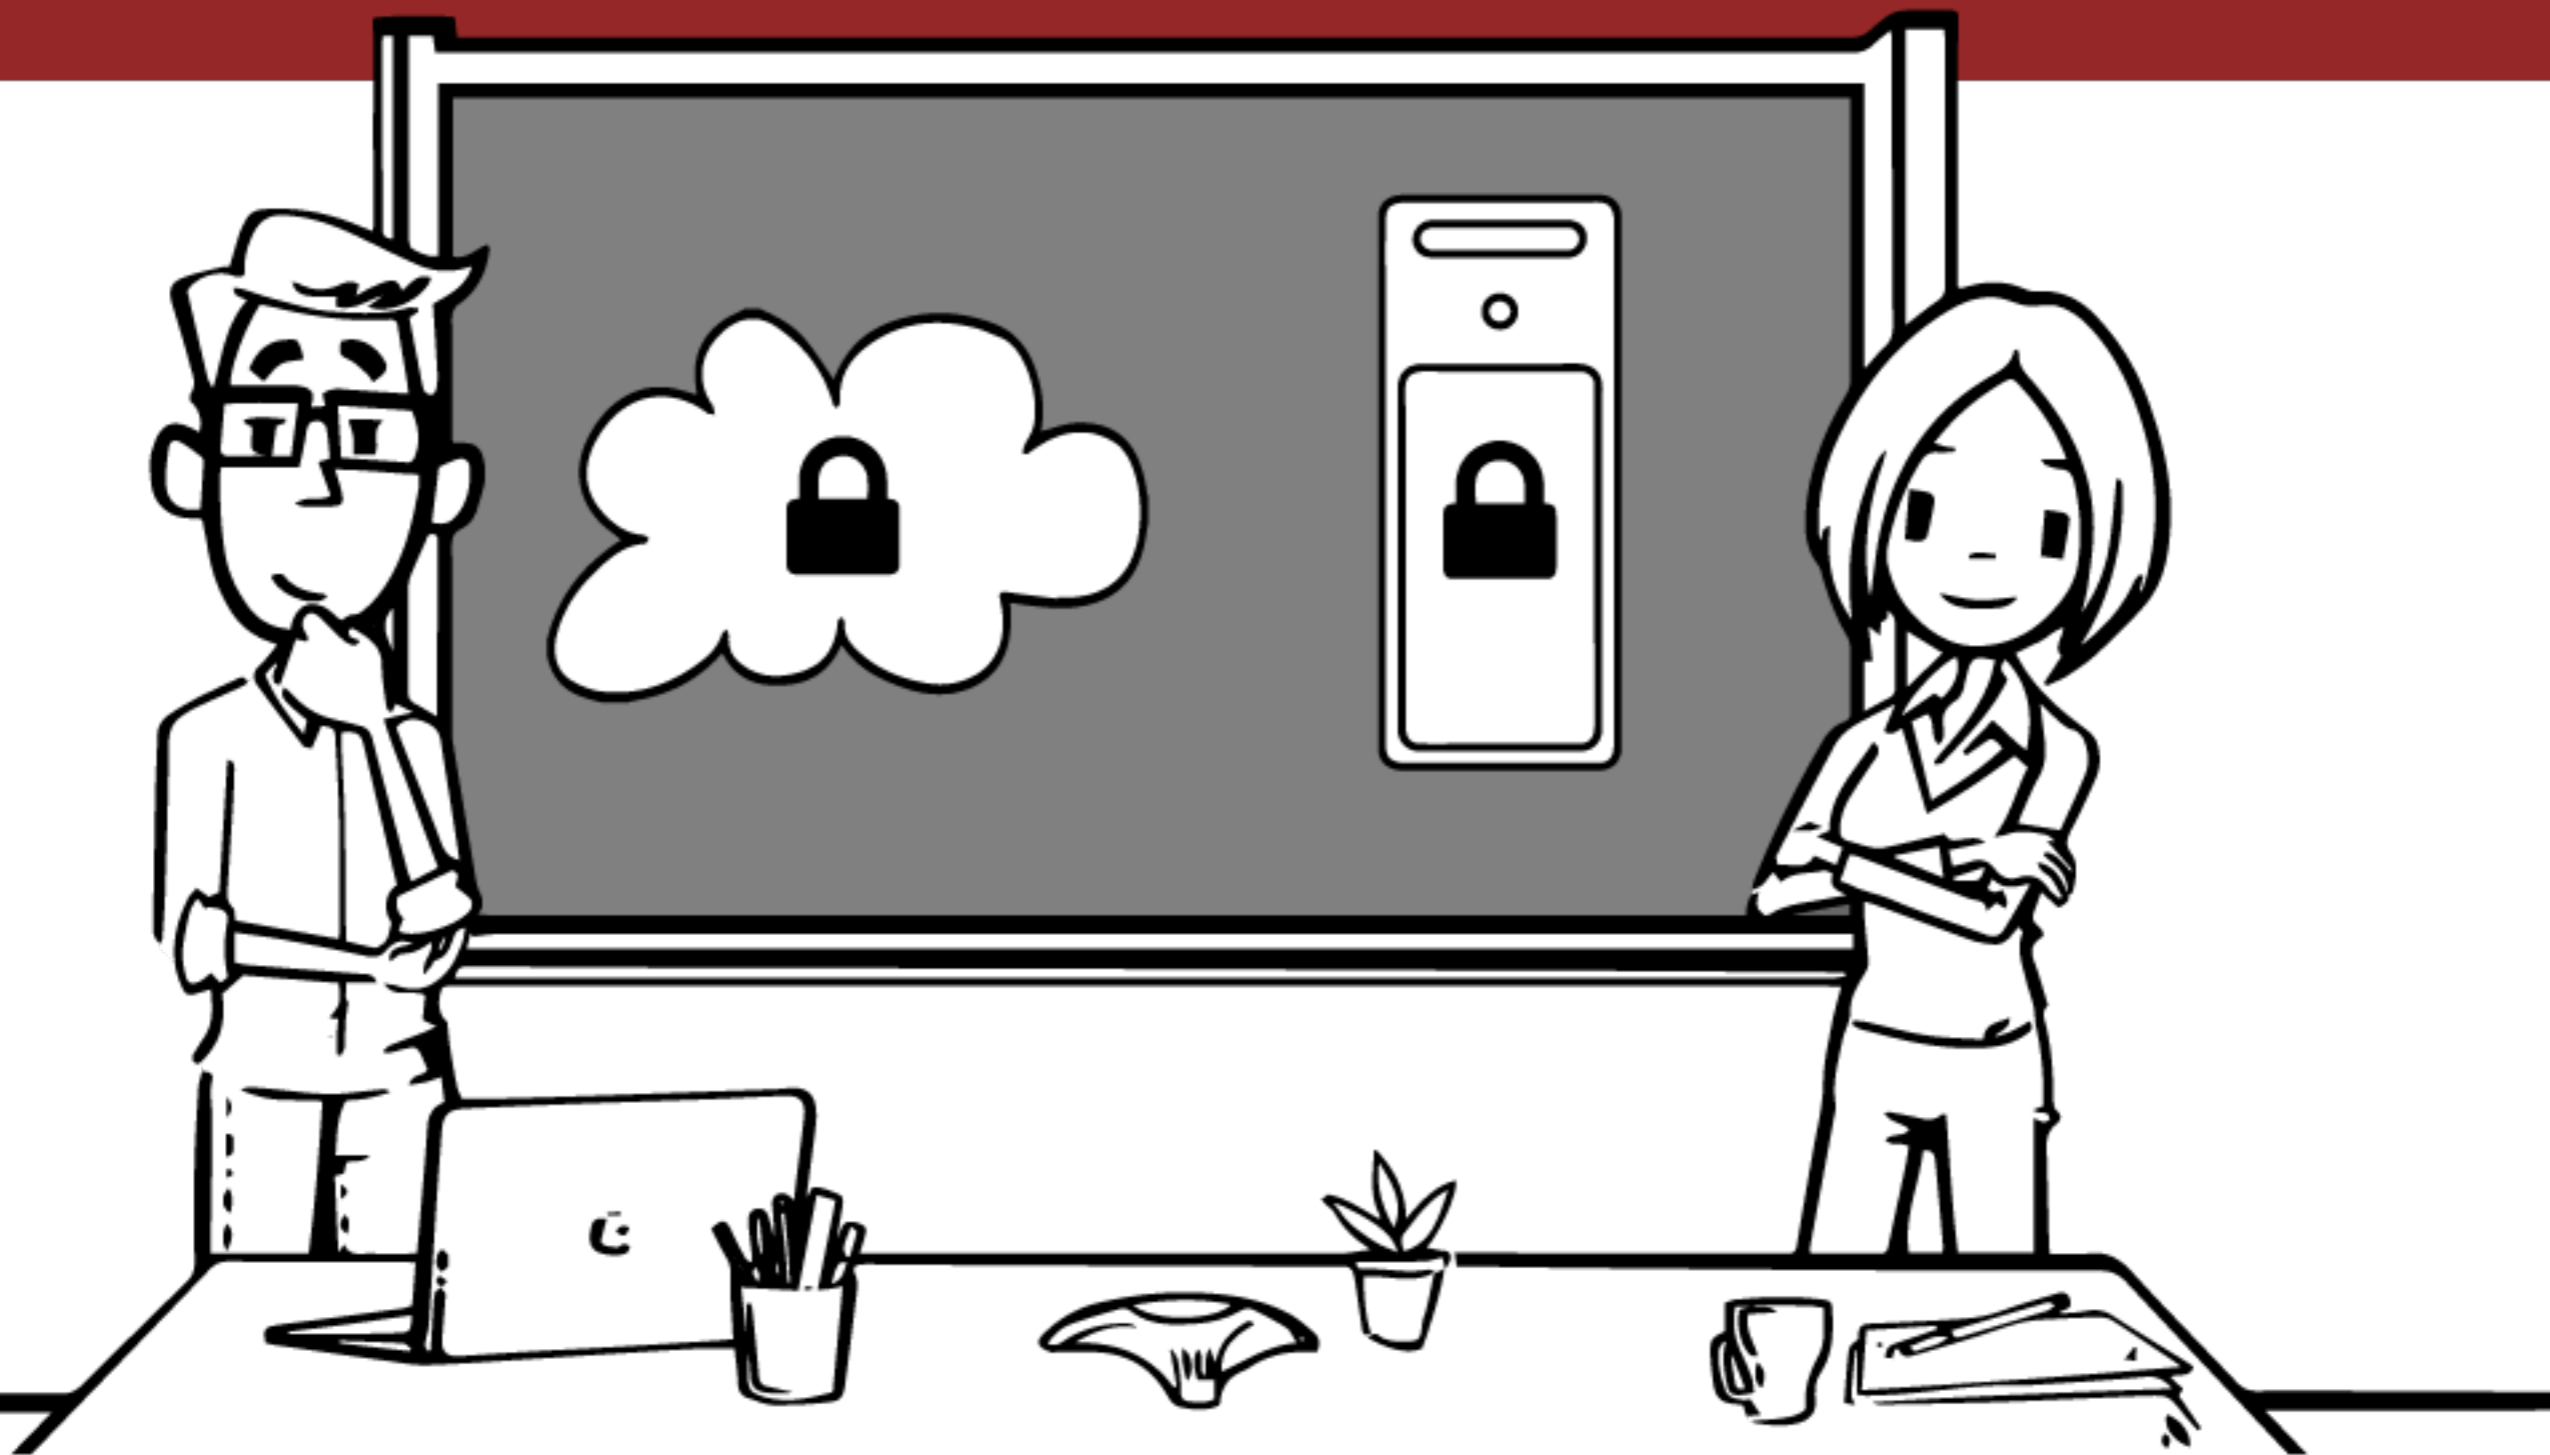

Easy to use. Training takes just a few minutes.

Scan paper documents and import digital documents with our fast, simple, easy to use interface.

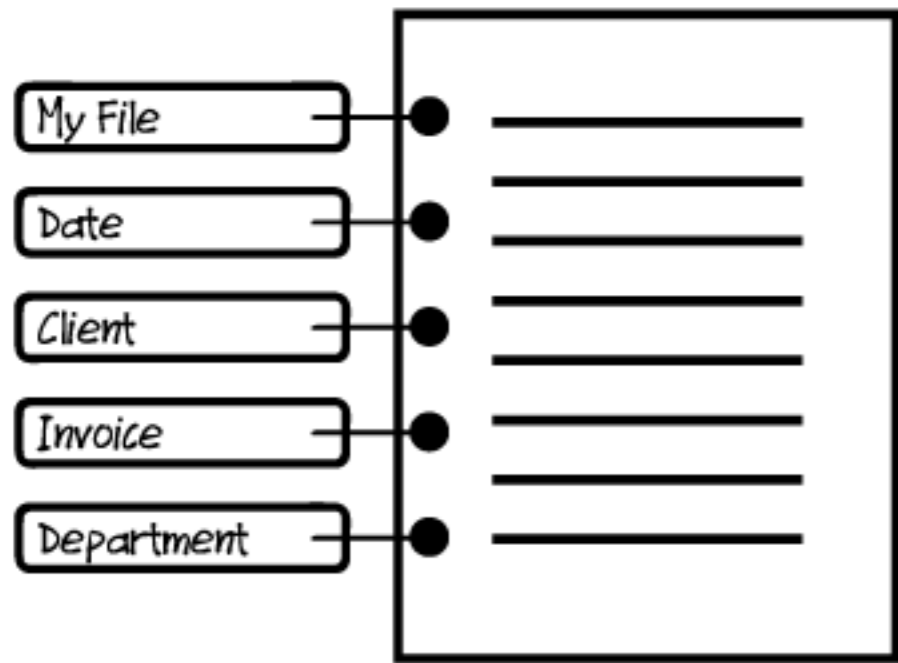

**Offered as a secure cloud service
and/or as software on your own server.**

Customize security access
for each user.

Add up to five data fields and numerous annotations without altering the original.

Eliminate mis-filing, damage, and loss associated with storing physical documents.

Full compliance with industry regulations for digital documentation.

**Most business documents must be kept for
seven years or more.**

Storage requires space.
Space costs money.

Searching & retrieving
records takes time.
And, time costs money.

Retrieve any file in seconds now,
not hours or days.

What used to be a complicated,
unreliable, time consuming process
is now **easy** and **affordable** with

SAFEViewTM
Document Management Systems

“ A lot of business software is very complicated and overly complex to set-up, maintain and operate. Whereas SAFEView is not only simple to set-up, it maintains itself. I believe SAFEView is to document management what Quicken[®] and Quick-books[®] has been to accounting. ”

- Tom Haggin
Founder Sybase
